Organizes Webinar on 12th June 2020 from 10:30 am to 12:30 pm through Zoom
on

**Effective Decision Making Tools during and beyond
COVID-19**

under the aegis of

Dear Sir,

The news about the spread of COVID-19 is changing fast and people are trying to make decisions about everything from whether to cancel vacations, to how to best protect themselves and their communities. There are several psychological and other reasons why you may find decision-making difficult right now.

First, there is a looming present threat. The disease is real. Around the world, people are dying from it and it is spreading rapidly enough that there is new news every day.

Humans are wired to pay attention to threats and so this story captures our attention in a way that a distant threat like climate change does not

Second, there is a lot of uncertainty about the spread of the virus. Third, people have very little control over the spread of the virus. Finally, all of the attempts to control the spread of the virus are fundamentally about prevention. All four of these factors are affecting our behavior and the decisions we make. The threat, uncertainty, and anxiety lead us to make short-sighted decisions.

The global pandemic has forced business owners and leaders to make some very tough decisions. Across the industry, leaders are deciding whether to lay off or furlough workers, cut pay, freeze hiring or cancel important programs and incentives, all while continuing to deliver top-notch service to clients and business partners. Same is the case with academic administrators. Administrators and academicians of educational institutes are also worried about the future and career of the students and concern about faculty and staff.

In this context,

Department of Electronics and Communication Engineering of Bundelkhand Institute of Engineering and Technology, Jhansi, UP is organising a **webinar on the topic" Effective Decision Making Tools during and beyond COVID-19' on 12th June 2020 from 10:30 am to 12:30 pm, in joint association with State Project Implementation Unit, UP.** The expert consented to this webinar are **Er. K. S. Venkatagiri**, Executive Director, Confederation of Indian Industry (CII), He has been associated with CII since 1992 and has played an important role in establishing CII-Sohrabji Godrej Green Business Centre as CII's Centre of Excellence on Green business. He is leading a team of over 80 professionals, who are offering advisory services to Indian industry in areas of energy management, green buildings, green companies, renewable energy and other related sectors and **Shri P. A. Kharwadkar**, Managing Director, Corona Plus Industries Limited, Kanpur, a man of principles and determination with vast experience, a successful entrepreneur and a dynamic social reformer.

It is our honor and pleasure that Hon'ble Vice Chancellor, Bundelkhand University , Jhansi, Prof. J. V. Vaishampayan will grace the occasion as Chief Guest.

The target participants are academicians and senior administrators.
